Note: The product covered is Series L-25N60-XXXX-YYYYA heat panels intended for use in radiant heating. These elements are rated for 120V voltages, and the watts density shall not exceed 100 W/ft.2 (1076 W/M2). X and Y values of the part number are unique to each series panel, used internally to identify the unique design, size and finish of each model in series.

Note: These components are for use in Recreational Vehicles only. Final acceptance of the component in the intended

application is subject to acceptance by the Recreational Vehicles certifier.
