Single Point Latching – Cylindrical or Mortise latches and deadbolts, or Rim type fire exit hardware for single swing doors, or active leaf of pairs when permitted.

Two Point Latching – Surface mount or Concealed vertical rod exit devices for single swing doors. Concealed vertical rod exit devices requires special door construction and is acceptable per the manufacturing specifications.

Three Point Latching – Single point latch for active leaf of standard pairs, Surface mounted manual, or Mortise type or manual or automatic flush bolts, or surface mount or concealed vertical rod exit devices for inactive leaf of pairs.

Four Point Latching - Surface mount or concealed vertical rod exit devices for both leaves of pairs. Concealed vertical rod exit devices require special door construction and is acceptable per the manufacturing specifications.

CATEGORY “A” AND “B” DOORS

Category “A” Doors contain intumescent in the door vertical edges and header. Category “B” doors and doors conforming to CAN/ULC S 104 do not require the door edge intumescent for single swing door applications, intumescent is optional. For doors swinging in pairs, intumescent is required at the meeting edges only.

WITH OR WITHOUT HOSE STREAM

This specification provides a construction for “without hose stream” applications. The hose stream test is required for CAN/ULC S 104 (Canada) but optional for UL 10B, UL 10C and NFPA 252 (USA)
