| 1      | Wall Panel  | **Manufacturer:** Norbec Architectural  
**Approved Types:** NOREX-L, NOREX-H, NOREX-S panels.  
**Thickness:** 51 – 204 mm (2 – 8 inches)  
**Core:** Polyisocyanurate (PIR) maximum 41.6 kg/m³ (2.6 lbs/ft³)  
**Skins:** Minimum 26 Gauge 0.404 mm (.0159 inches)  
**Installation:** Panels can be installed vertically (NOREX-L and NOREX-S) or horizontally (NOREX-H not shown). Panels are manufactured with a factory installed butyl caulking on both female halves of the joint. Optional exterior butyl or silicone caulking can be applied. Panels are mechanically connected to underlying structural members spaced per site specifications to resist intended design loads as determined by the Design Professional, or the Authority Having Jurisdiction. |
| 2      | Joint Fasteners | **Approved Types:** Sheet metal screw.  
**Installation:** Joint stitch with sheet metal screw should be installed at panel ends. |
| 3      | Structural Members | **Approved Types:** Galvanized steel  
**Installation:** Design and spacing of structural members to be installed to resist intended design loads as determined by the Design Professional, or the Authority Having Jurisdiction. |
