 - "Modular Homes"
 - QAI Logo shown here:

Models / Ratings: Factory Built Modular Homes constructed under Part 9 of the National Building Code of Canada and the Alberta Building Code. Structures are single or multi-family dwellings classified under one Major Occupancy (Group C – Residential), comprised of single or multiple modules up to 3 storeys in building height. Modular Homes under this listing scope have a building area not exceeding 600m².

Homes are designed and constructed within the limitations of Part 9 of the Building Codes and have been evaluated with vertical fire and sound separations. This listing includes multi-unit residential buildings such as duplexes and row houses that require vertical Fire and Sound separations.

For a full list of structures covered under the above occupancy class, please refer to Division B, Notes to Part 3, A-3.1.2.1.(1) Major Occupancy Classification in the National Building Code.

Structural:

Conventional Wood Frame Construction with Roof Trusses designed in Part 4.

Electrical:

120/240V, 60Hz, 1PH, 200A max

Plumbing:

Conventional drainage and venting systems to a maximum of 240 hydraulic fixture units.

Heating and Ventilation:

Modular Homes may be equipped with central forced air furnaces and electrical baseboard heaters. Units may be equipped with heat recovery ventilators and air conditioning units.

Gas:

N/A – No gas system is installed in the Factory

Solid Fuel Burning Appliances:

Installer must have W.E.T.T. Certification.

Notes: Modular Homes included in this listing are manufactured at a central facility and transported to the installation location. These modules must include provisions for on site interconnections, connection to municipal services (storm and sanitary), and electrical power supply. QAI Certification covers the construction of the modular homes, including any factory installed electrical, plumbing, appliances, and fixtures. QAI Certification is intended to obviate the necessity of further inspection by the local regulatory authorities except for all on site considerations including all work done outside the manufacturing facility.

Site installation of productions must be done according to manufacturer's installation instructions and in compliance with the requirements set out by the Authority Having Jurisdiction.

The materials, products or systems listed herein have been qualified to bear the QAI Listing Mark under the conditions stated with each Listing. Only those products bearing the QAI Listing Mark are considered to be listed by QAI. No warrantee is expressed or implied, and no guarantee is provided that any jurisdictional authority will accept the Listing found herein. The appropriate authorities should be contacted regarding the acceptability of any given Listing. Visit the QAI Online Listing Directory located at www.qai.org for the most up to date version of this Listing and to validate that this QAI Listing is active. Questions regarding this listing may be directed to info@qai.org. Please include the listing number in the request.
