Recognized Listing Agencies

As a condition of their membership, manufacturer members of the RV Industry Association pledge in writing to build RVs that conform to the association’s adopted standards. NFPA 101-2020 Standard for RVs, ANSI A519.5 Standard for Park Model RVs, ANSI Low Voltage (LV) and National Electrical Code (NEC). Within these adopted standards are various requirements that certain equipment and materials be labeled “Listed.”

“Listed” means equipment, material, or services included in a list published by an independent third-party organization that has reviewed the manufacturing process of a product and has independently determined that the listed product complies with specific standards for safety, quality, or performance. The third-party organization states that the equipment, material, or service is suitable for a particular purpose. These third-party agencies also periodically re-evaluate the listed items.

During RV Industry Association inspections of member manufacturers, inspectors verify that the equipment and materials required to be listed are so identified by a third-party listing agency that is recognized by the association.

Any third-party listing agency seeking recognition by the RV Industry Association must submit information to prove they meet the organization’s Third Party Conditions and Criteria for recognition.

Listing Agencies Recognized by the RV Industry Association

Revised 6/1/18 - 8/31/21

Quality Auditing Institute (QAI) Laboratories Ltd.

3950 North Fraser Way

Burnaby, BC, Canada V5J 5K5

Tel: 604-527-8378
