QAI CODE EVALUATION REPORT PROGRAM

GAIN ACCEPTANCE OF YOUR BUILDING PRODUCT

What is a Code Evaluation Report (CER) ?

A QAI CER is a published report demonstrating that your building product complies with applicable sections of the building code for specific applications. It is often used to show building officials and customers that complex or innovative building products which aren't currently code prescribed meet specific code requirements.

Benefits of QAI's Code Evaluation Report service:

- Expert knowledge of test methods and code requirements.
- Support for both the USA and Canadian building codes.
- Engineer sealed CER available for most States and Canadian Provinces.
- Consolidated testing, inspection, listing and code reports with a single agency to help reduce costs and disruptions.
- An experienced partner that will work with you to meet your overall compliance objectives.
- Professional support to get your product to market quicker.

About QAI

QAI is a testing, inspection and certification agency accredited by SCC and IAS for a variety of products and assemblies used in construction from durability, to fire resistant assemblies. Founded in 1994 by a group of experienced industry professionals, QAI is an independent 3rd party organization that has established an international reputation for offering cost effective and an unparalleled client experience.

TRANSFER YOUR CODE EVALUATION REPORT TO QAI

Transfer your Code Evaluation Report (CER) to QAI

Already have a CER with another third-party agency and need to make revisions? Bring your code report to QAI and we will work with you to complete your revisions and publish a new QAI Code Evaluation Report. As an accredited testing, inspection and certification body following the relevant ISO quality requirements, we have the ability to perform services quickly and efficiently in house!

What is the process for a new Code Evaluation Report (CER)?

1. Client submits an application including their existing evaluation report and requested revisions.
2. QAI reviews the application, product configurations, installation methods, test data and other pertinent information to create a statement of work.
3. The product is evaluated and a CER is drafted based upon product uses and limitations.
4. Quality manual is reviewed and an Inspection is performed.
5. CER report is published and routine follow-up inspections are scheduled.
