

ONSITE TESTING FOR WINDOWS AND DOORS

THE ADVANTAGE OF AN ACCREDITED ISO/IEC 17025
TESTING LABORATORY

Onsite testing is conducted to ensure the quality of installation & performance of fenestration products. Onsite testing is also conducted to verify that fenestration products are in compliance with architectural & industry specifications. This is achieved by testing air leakage, water penetration, structural performance & other required tests which are generally prescribed by architects, engineers & code officials.

Why choose QAI?

- We provide the confidence and professionalism associated with an ISO/IEC 17025 accredited laboratory.
- We work closely with building officials, architects, and engineers to ensure that the building envelope meets the requirements.
- Customer service is a key core value. We make ourselves readily available to accommodate to our clients' needs.
- We utilize state-of-the-art equipment at multiple locations.

Typical Test Methods:

- ASTM E1105
- ASTM E783
- ASTM E330
- ASTM E935
- AAMA 501.1
- AAMA 501.2
- AAMA 501.3
- AAMA 502
- AAMA 503
- AAMA 511
- TAS 105
- TAS 106
- ANSI Z97.1
