

THE PRODUCT TESTING PROCESS

Testing allows you to demonstrate compliance of a product with particular requirements or performance attributes. With QAI's state of the art equipment, we are able to measure the performance of your product and provide a report containing the results.

TESTING NEEDS INCLUDE

Product R&D

Compliance verification

Third-party witness testing

Demonstrate product features

Environmental compliance

HOW TESTING WORKS

Your company would like to test a product.

1

A technical expert will receive your samples at one of QAI's state-of-the-art testing facilities. You have the option of observing your tests.

3

You have successfully found out how your product performs to a set of testing criteria. A detailed report is provided to you.

5

2

You contact QAI and receive a response within 24 hours from an industry expert that will help you:

- determine a specific testing program for your needs.
- set timelines, costs, and other requirements.

4

Your assigned project manager will share the results with you and provide a test report.

A test report only applies to the actual physical sample that is tested.

If you are looking to demonstrate ongoing compliance you may want to learn more about [QAI's Certification Program](#).

ABOUT QAI

Founded in 1995, QAI is an independent 3rd party testing, inspection and certification agency that has established an international reputation for offering flexible solutions and unparalleled client experience.

With multiple locations and a wide scope of accreditation, we can provide a full suite of compliance services that are recognized by Authorities Having Jurisdiction (AHJ) in various markets.
