QAI LISTING REC782-2, Edition 1 MAD Building Technologies Inc. WALL PANELS evaluated under CSA A277 & Part 9 of Ontario Building Code

For evaluation of wall panels: W1; W2; W2a; W2b; W3; W3a; W3b; W4; W4a; W4b refer to attached Appendix A for construction details							
No.	COMPONENT	DESCRIPTION					
1.	Cladding (Optional)	Product: Certification:	roduct: Vinyl, Metal Cladding, Fiber Cement Cladding certification: Vinyl Siding certified per CAN/CGSB-41.24 Sheet steel cladding (minimum thickness of 0.3mm) certified per CAN/CGSB-93.3-M				
			Aluminum sheet cladding certified per CAN/CGSB-93.1-M				
		Framing:	Dimensional Lumber (SPF)	Minimum 2x4	(W1; W2; W3; W4) ⁽¹⁾ (W2a; W3a; W4a) ⁽²⁾ (W2b; W3b; W4b) ⁽³⁾		
	Wood Frame		Structural Composite Lumber (SCL)Use of SCL, done under Part 4 of NBC, is approved by a registered professional engineer and is equivalent to the above SPF framing.				
2.		Certification:	SPF SCL	Grade Stamp: S CCMC report or	tud or better as required by design equivalent		
		Stud spacing:	Maximum 24" (600 mm) OC				
		Fasteners:	2 nails, Ø 0.131" x 3-1/4" per stud end for all dimensions, 3 nails, Ø 0.120" x 3-1/4" per stud end for all dimensions, or 2 construction screws, #8 x 3"				
	Insulation (Optional for	Product:	Mineral Wool Batts, Glass Wool Batts, Spray Polyurethane Foam				
3.		R Value:	Mineral and Glass Wool Batts certified per CAN/ULC-S702				
	VV1)	••••	Spray Polyurethane Fo	am certified per C	CAN/ULC-S705		
	Sheathing	Product:	Plywood Panel, OSB F Gypsum Board (1 or 2	Panel, ZIP System layers)	Sheathing, Fiberboard Panel,		
		Thickness:	Minimum 7/16" (11.11 mm)				
		Certification:	Plywood Panel certified per CSA 0151				
			ZIP System Sheathing certified per ESR-1474				
4.			Fiberboard certified per CAN/ULC-S706				
			Gypsum Board certifie ASTM C1396/ C1396M	d per ASTM C117	8/ C1178M or		
		Fasteners:	Nails 2" (50mm) × 0.113 min; 6" (150mm) on perimeter & 12" (300mm) on intermediate studs				
			Construction screws #8x2 in (50mm) min				
		-	Drywall Screws #6 – 1.625" (15.8mm) min				
	Rigid Insulation	Product:	Extruded Polystyrene (XPS) or Expanded Polystyrene (EPS) Boards, ZIP System R-Sheathing				
5.		R value:	Minimum R5				
	(Optional)	Certification:	XPS & EPS certified per CAN/ULC-S701				
				ZIP System R-Sheathing certified per ESR-3373

	Weather Resisting Barrier (Building Wrap)	Product:	Spun-Bonded Polyolefin (SBPO); Self-Adhesive Membrane; Liquid-Applied Air Barrier Material; ZIP System Sheathing and ZIP System R-sheathing			
6.		Certification:	SBPO, Self-Adhesive Membrane & Liquid-Applied Air Barrier Material certified to CAN/CGSB-51.32-M or CCMC report or equivalent			
			ZIP System Sheathing certified per ESR-1474			
			ZIP System R-Sheathing certified per ESR-3373			
		Product:	Wood Furring or Metal Resilient Channel			
		Location:	Interior face	all walls		
			Exterior face	W1, W4, W4a, W4b		
7	Furring	Туре:	Wood furring:	1" x 3" (19 x 64 mm)		
7.	(Optional)		Metal Resilient Channel:	Bailey Metal Products RC Plus and D-10001		
		Spacing:	At maximum 24" (600 mm) OC			
		Certification:	Metal resilient Chanel per	CSA S136		
		Fasteners:	2 nails per stud: 0.113 x 2" min; Minimum penetration 1-1/2" (38mm)			
0	Vapour	Product:	Minimum 0.15mm (6-Mil) Polyethylene Sheet			
8.	Barrier	Certification:	Certified pet CAN/CGSB-51.34-M			

ELECTRICAL INSTALLATIONS

Structural panels included in this Listing may have electrical wiring and junction/outlet boxes installed for typical household applications. The Listing does not include the installation of appliances or equipment.

PLUMBING INSTALLATIONS

Structural panels included in this Listing may have plumbing pipes and connections installed. The Listing does not include the installation of appliances or equipment.

EXCLUSIONS

Fire resistive assemblies and acoustical performance is not covered under this listing.

All windows, doors, gas systems components, plumbing and electrical equipment other than those described above are outside of the scope of this listing. For roof and floor panels refer to dedicated section.

This listing does not include panels intended to be used in multi-family dwellings requiring fire and sound separation or shared egress facilities, hotels and motels. It does not address panelized products for use in commercial, and office buildings, stores, hospitals, classrooms, and daycares and/or any buildings designed with multiple major occupancies.

CONDITIONS OF VALIDITY

This listing is based on the assumption that no fundamental changes are made to the product described in this listing and engineering designs.

The performance of the panels could be affected by excessive humidity. Like other wood products, these panels must be protected from exposure to moisture/rain.

The field erection sequencing must be in strict accordance with the manufacturer's installation instructions and the applicable building code. In the event of a conflict between the manufacturer's installation instructions and code requirements, code stipulations shall govern. Approved construction documents shall be available at all times on the jobsite during installation.

Notes:

- ⁽¹⁾ Any design outside of Section 9.23 of OBC is done by a registered professional engineer under Part 4.
- ⁽²⁾ Under Part 9 of OBC, it is acceptable only for gable ends (i.e. no load on wall and no finishing on inside) or non-load bearing interior partitions. For any other uses, approval by a registered professional engineer is required.
- ⁽³⁾ This design is done under Part 4 of OBC and is approved by a registered professional engineer.
