

INDEPENDENT THIRD-PARTY MATERIALS TESTING LABORATORY

COMPREHENSIVE TESTING IN FAILURE ANALYSIS,
REVERSE ENGINEERING, METALLURGY, CHEMISTRY,
MECHANICAL, AND POLYMERS.

ATRONA-QAI is a trusted leader in independent testing and consulting, specializing in the materials industry: Metal, Polymers and more. We offer a wide range of testing capabilities tailored to your specific needs and providing expert support for your project from beginning to end.

ATRONA-QAI OFFERS

- Expert in-house metallurgists and chemists
- Testing tailored to your requirements and specifications
- Technical support for heat treating, welding, fasteners, and other parts
- In depth reports to your requirements, plus after test support.
- State-of-the-art testing equipment

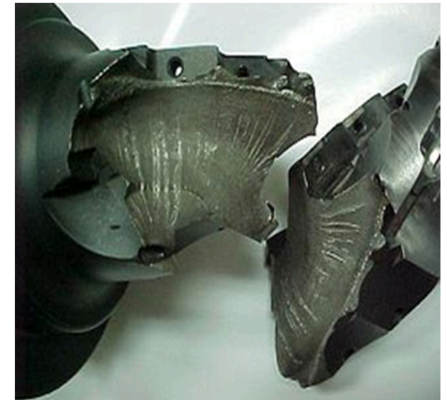

ATRONA-QAI SERVICES INCLUDE

- Tensile, Yield, and Elongation testing
- Charpy Impact Testing
- Failure analysis, reverse engineering and heat treat support.
- Chemical Analysis and Material Identification
- Hardness and Microhardness testing
- Calibration
