

HARRINGTON GEOTECHNICAL ENGINEERING, INC.

**GEOTECHNICAL ENGINEERING • SOILS INVESTIGATION •
MATERIALS TESTING**

Harrington Geotechnical Engineering, Inc. (HGEI), located in Orange County, provides integrated geotechnical engineering, engineering geology, and accredited materials testing to support safe, compliant construction projects throughout southern California. Backed by QAI Laboratories and over 30 years of experience, HGEI delivers timely, practical recommendations for owners, developers, architects, engineers, and public agencies.

How You Can Benefit

- Geotechnical engineering solutions for residential, commercial, industrial, and hillside development projects providing geotechnical investigations, testing, recommendations, slope stability and seismic evaluations
- AASHTO-recognized materials testing for soil, aggregate, concrete, and asphalt
- Field testing and on-site construction observation

About HGEI-QAI

With over three decades of industry experience, HGEI and QAI have joined forces to offer an expanded suite of engineering, testing, inspection, and certification services. HGEI's geotechnical and materials testing expertise aligns seamlessly with QAI's accredited programs across building products, electrical systems, and modular structures. Together, we continue to support clients with the expertise and integrity that have defined both companies for decades.
