- n) Electrical system voltage, frequency, and amperage
- o) Code(s) and standard(s) with edition date or version in which the structures have been constructed to

3. Other markings as required by the relevant code.

Note 2: The QAI labels and specification nameplate are available from QAI and must be applied at the factory.

Models / Ratings: The scope of buildings covered by this Listing includes:

Homes:

Single family dwellings classified under one major occupancy (Group C – Residential), constructed in single or multiple modules, 1-storey configurations. Modular homes under this scope have a building area not exceeding 600m².

Modular Homes are designed and constructed within the limitations of Part 9 without fire and sound separations. This listing does not include multi-residential buildings requiring fire and sound separation or shared egress facilities, such as duplexes, row houses, townhouses, hotels and motels, and/or any buildings designed with multiple major occupancies

For a full list of structures covered under this occupancy please refer to Notes to Part 3, A-3.1.2.1.(1) Major Occupancy Classification in the applicable Building Codes.

Structural:

Conventional Wood Frame Construction within the limitations of Part 9 of the applicable Building Codes. May include structural framing, roof and floor trusses systems designed in accordance with Part 4 by Registered Professionals.

Electrical Ratings:

120/240V, 60Hz, 200A Max.

Plumbing:

Conventional drainage and venting systems to a maximum of 240 hydraulic fixture units.

Heating/Ventilation:

Units may be equipped with ducting for installation of a central forced air furnace on site and air conditioning (Electric Only)

Gas Systems:

N/A

Notes: Modular Homes included in this listing are manufactured at a central facility and transported to the site. These modules must include provisions for onsite interconnections, connection to municipal services (water and sewage), and electrical power. QAI certification covers the construction of modular homes including any factory installed plumbing, and electrical services, appliances, equipment and fixtures. QAI certification is intended to obviate the necessity of further inspection by the local regulatory authorities except for site connections to services or to other modules and for site installed features.

Site installation of products must be done according to manufacturer's installation instructions and in compliance with the requirements set by the local authority having jurisdiction.

The materials, products or systems listed herein have been qualified to bear the QAI Listing Mark under the conditions stated with each Listing. Only those products bearing the QAI Listing Mark are considered to be listed by QAI. No warrantee is expressed or implied, and no guarantee is provided that any jurisdictional authority will accept the Listing found herein. The appropriate authorities should be contacted regarding the acceptability of any given Listing. Visit the QAI Online Listing Directory located at www.qai.org for the most up to date version of this Listing and to validate that this QAI Listing is active. Questions regarding this listing may be directed to info@qai.org. Please include the listing number in the request.
